

Non-Contact Voltage Tester

MTP 101

Non-Contact Voltage Tester

- Overvoltage category CAT.IV 1000V
- Dual voltage range: 12-50V and 51-1000V
- Integral torch light
- Two selectable voltage ranges / sensitivity levels
- Suitable for aircraft electrical systems up to 400 Hz
- White tip with bright all round light display
- Indication of voltage fields via red LED and acoustical signal via integrated buzzer
- Power switch with visual indicator
- Automatic timed switch-off
- Battery monitoring with visual indicator
- Water proofed rugged housing (IP65)
- Slim, isolated measurement sensor
- Ergonomically designed and easy handling
 - slip-proof surface.

Includes: Voltage tester, x02 AAA batteries, manual

CAT IV
1000V

IP65
